FUSE

FUSE FORGED CARBON

The FUSE outsole is a 1-piece rigid composite construction offering a push plate under the foot to reduce any compression or energy loss through the stride. Stiffens the lower portion of the skate to optimize energy transfer from the LOAD to EXPLODE mechanics of skating.

AMP FLEX 3.0 FACING

AMP Flex 3.0 facing, is a flex technology added to the top 3 eyelets to allow increased forward flex through the skating stride, enhancing range of motion for the skater.

FUSE-X TOE CAP

This toe cap fuses the fit and feel of the MACH toe cap with the performance and function of SHADOW. The toe cap has X-shaped wings that extend into the lower facing and wraps under the foot, replacing the abrasion pad to increase the torsional stiffness in the lower half of the skate.
